DRIVING REVENUE WITH NEW PAYMENTS SOLUTION FOR OMS

Checkout.com is a global payments solution provider that helps businesses and their communities thrive in the digital economy. They offer innovative solutions that flex to your needs, valuable insights that help you get smart about your payments' performance, and expertise you can count on as you navigate the complexities of an ever-shifting world. Since 2012, they've grown to over 1700 employees in 19 global offices, each one of them passionate about helping thousands of businesses worldwide grow through their next-generation payments platform.

CHECKOUT.COM CHALLENGES

Lacked a solution to integrate with Salesforce Order Management

Checkout.com was looking to offer payments support in Salesforce Order Management.

Checkout.com needed a solution that would integrate their global payments platform with Salesforce Order Management and support:

1. International and domestic credit cards payment capture

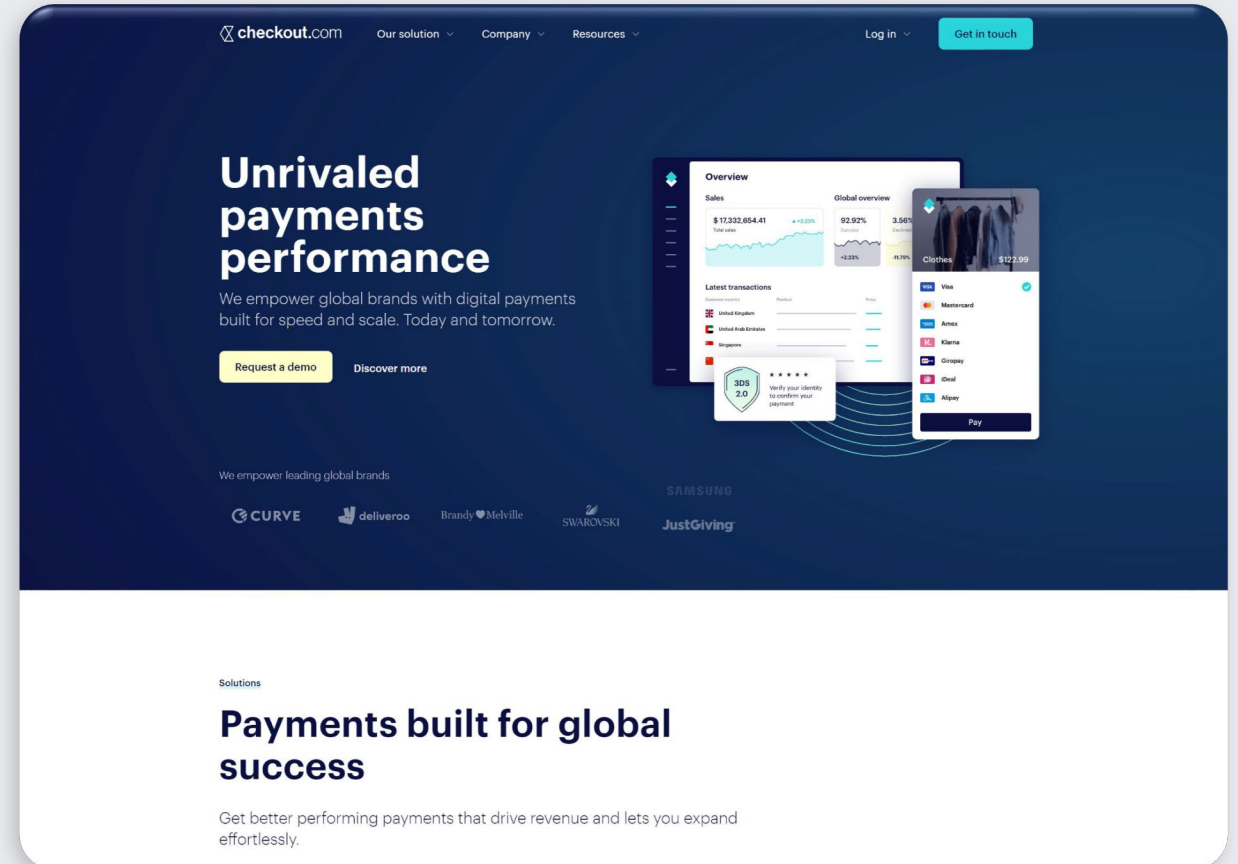

2. Cash ATM payments

3. Alternative wallets

OSF'S SOLUTION

Package development

- ✓ OSF Digital developed a package to seamlessly integrate Checkout.com with Salesforce Order Management and provide best-of-breed payment and order management.
- ✓ The “Checkout.com Payments for SOM” package helps integrate Checkout.com payment provider. It implements the capture and refund payment actions.
- ✓ With this package, Checkout.com is now empowered to help Salesforce Order Management merchants seamlessly integrate better payment solutions globally.

OSF'S SOLUTION

Package features and benefits

Checkout.com Payments for SOM package solution allows to:

- ✓ Capture and refund payments directly from Salesforce Order Management

- ✓ Webhook fallback logic implemented for payment capture and webhook signature for securing the payment notifications.

- ✓ Support various payment methods, including:

Credit Cards

Digital Wallets

Invoice and pay later

Klarna.

OSF'S SOLUTION

Checkout.com Payments Integration for Salesforce Order Management

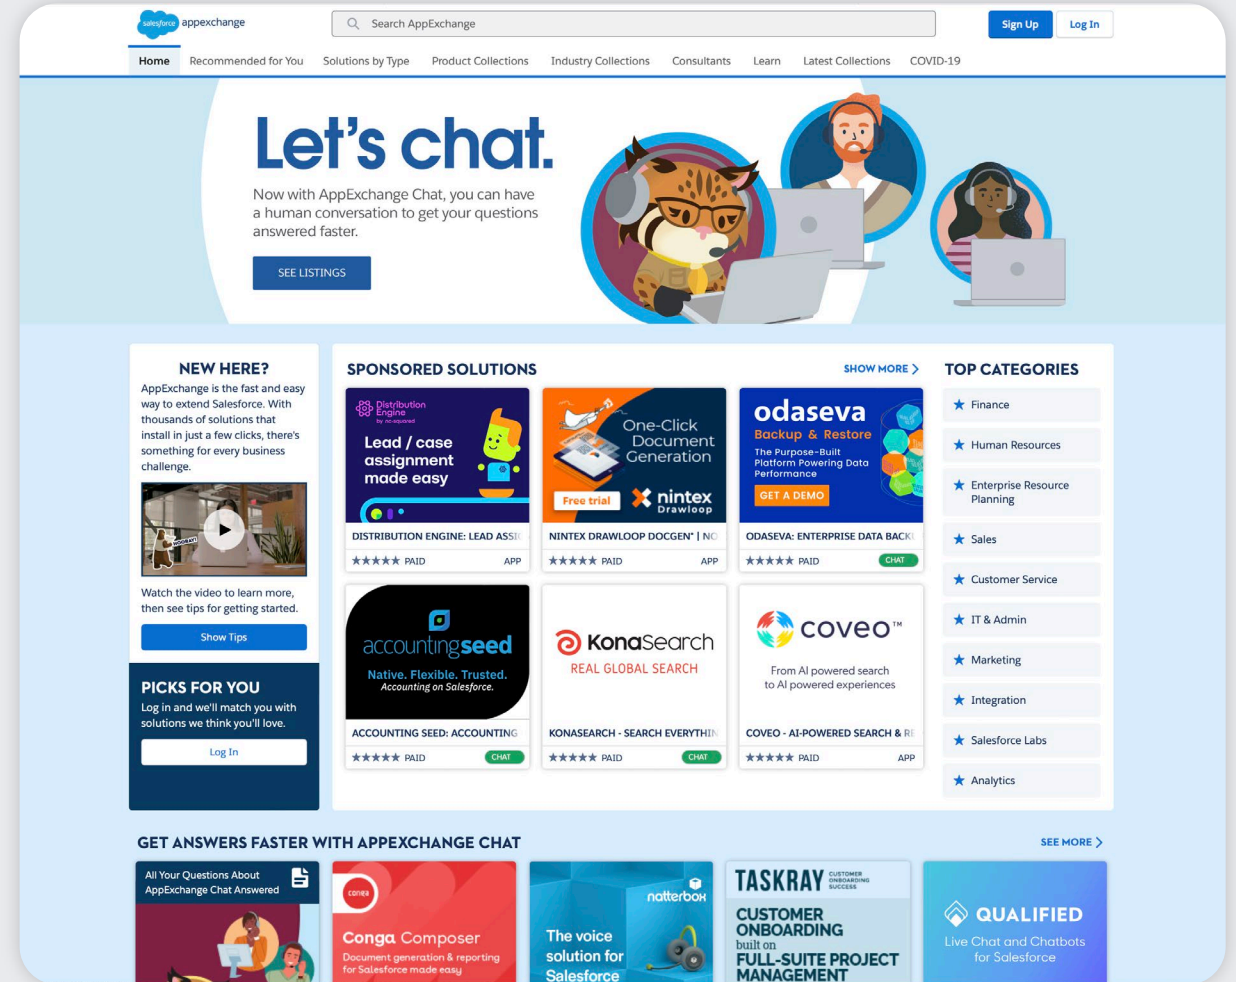

Enabling quick deployment with Checkout.com

The Checkout.com Payments Integration for Salesforce Order Management is now available on Salesforce's AppExchange.

The integration is written in simple yet powerful REST APIs, offering reliability and ensuring the technical integration is straightforward and deployment time is reduced.

There are no implementation costs for adding Checkout.com to Salesforce Order Management - just quick installation.

SEE ON APPEXCHANGE

RESULTS

Driving new revenue

Thanks to OSF's development work, Checkout.com is now equipped to open new opportunities and drive new revenue by addressing the business needs in the order management segment.

They can now better meet its clients' needs by offering them the possibility to manage payments directly from Salesforce Order Management, capture payments when the items are shipped and provide a refund for a return.

TESTIMONIAL

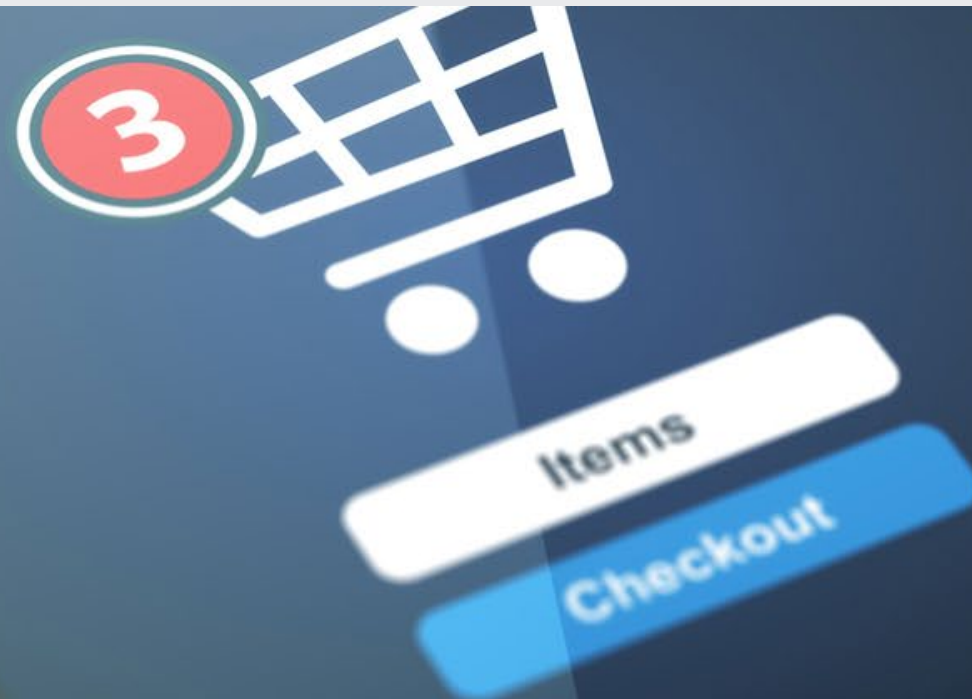

OSF | DIGITAL

Our work through the eyes of our clients

“The OSF Digital team truly went above and beyond with our Salesforce Order Management cartridge implementation. The team was responsive, creative, and thorough and helped us stay on schedule to launch in AppExchange as soon as possible — ultimately, driving new revenue faster and shortening the time to break even.”
